zone espaces verts

The site plan illustrates the layout of the Bocage parking lot. It features several parking areas: a long row of spaces at the top, a central area with diagonal parking, and two long rows of spaces at the bottom. Green spaces are indicated by hatched patterns, and trees are represented by green circular symbols. The plan also shows a road network, including Avenue Emile Didier, and various infrastructure elements like pedestrian crossings, bicycle lanes, and underground containers. A red rectangle highlights a specific area on the right side of the plan.
